Enlit Europe Summit 01/12 (12:30 – 13:00 CET)

Session: Technologies that enable Data Exchange

Miguel Ángel Sánchez Fornié

Access to the recording of the presentation [here](#)

12:30 - 13:00

Panel Discussion and Q&A

Session: Technologies that enable Data Exchange

Chairperson

-  Lorena Skiljan, Chief Operating Officer - Nobilegroup

Speakers

-  Antoine Jourdain, VP Operations and International - Enedis
-  Mark van Stiphout, Deputy Head of Unit - Research Innovation Competitiveness and Digitalisation - DG Energy - European Commission
-  Gerrit Jan Schaeffer, Chief Executive Officer - Energyville
-  Derek Wallace, VP of Marketing - LoRa Alliance
-  Scott Harden, Chief Technology Officer, Energy & Sustainability - Microsoft
-  Francis D'Souza, Executive Committee member and Chair of the Data Communication and Protection Working Group - ESMIG
-  Miguel Gaspar Silva, VP ESMIG and Global Head Utilities Industry Business Unit (IBU) Utilities - SAP SE
-  Miguel Ángel Sánchez Fornié, Secretary General - PRIME Alliance 

Enlit Europe Hub 01/11 (11:45 – 12:30)

Data: Enabling successful utility digitalization programmes – A strategy for success

Kaveh Razazian on behalf of PRIME Alliance

Access to the recording of the presentation [here](#)

Kaveh Razazian

Chief Technology Officer of Energy and Telecom, Sagemcom

Kaveh Razazian is the CTO of Energy and Telecom at Sagemcom, France who is overseeing the technical advancement and development as well as establishing milestones and goals in the field of smart grid communication (PLC, Cellular and RF technologies). He also leads the strategic innovation team in the field of end to end Smart Grid solutions.

Sessions

01-Dec-2021 11:00 - 11:45

Panel Discussion: Regulatory, Standards Landscape and Cost, Benefits Analysis

01-Dec-2021 11:45 - 12:30

Panel Discussion: Regulatory & Standards Landscape

11:45 - 12:30

Panel Discussion: Regulatory & Standards Landscape

Session: Enabling successful utility digitalisation programmes - A strategy for success

Chairperson

Willem Strabbing, Technical Director - ESMIG

Speakers

Sergio Lazzarotto, President & Executive Director - DLMS User Association

Pieter Coetzee, President - IDIS Industry Association

Charles Van Dyck, Head Working Group Marketing - OMS

Peter Jensen, Chair of TC13 - IEC

Mark Ossel, Board Member - OSGP Alliance

Kaveh Razazian, Chief Technology Officer of Energy and Telecom - Sagemcom

COMPANY PROFILE

A STITCH IN TIME SAVES NINE

Specialised smart metering maintenance saves costly cleanups, says Arkossa.

Tomorrow's networks of smart meters will be more than just a collection of devices. They will be a complex system of interconnected devices, each with its own role to play. The challenge is to ensure that these devices are maintained and repaired in a timely and cost-effective manner. This is where smart metering maintenance comes in. It is a specialised service that focuses on the prevention and early detection of faults in smart meters. This is done through a combination of remote monitoring and on-site visits. The result is a more reliable and efficient network of smart meters, which in turn leads to a more reliable and efficient power supply for customers.

Arkossa is a leading provider of smart metering maintenance services. Our team of experts uses a combination of remote monitoring and on-site visits to identify and resolve faults in smart meters. This is done through a combination of remote monitoring and on-site visits. The result is a more reliable and efficient network of smart meters, which in turn leads to a more reliable and efficient power supply for customers.

COMPANY PROFILE

PRIME GATEWAYS ARE THE ENABLERS OF THE LV COMMUNICATIONS EVOLUTION

Galder Vázquez highlights some of the important roles of gateways.

Low voltage LV smart-grid solutions have high complexity due to the variety of devices connected to the network and the need for a high level of interoperability. This is where gateways come in. They act as a bridge between the different devices and the network, ensuring that they can all communicate effectively. This is done through a combination of hardware and software. The result is a more reliable and efficient network of smart meters, which in turn leads to a more reliable and efficient power supply for customers.

COMPANY PROFILE

FAQS ABOUT POWERLINE COMMUNICATION TECHNOLOGY

Times might have changed, but the key questions with regard to PLC applications remain the same, writes Chaitoo Adnan.

A powerline communication (PLC) technology has been around for a long time, but it is only in recent years that it has gained widespread adoption. This is due to a number of factors, including the need for a more reliable and efficient power supply for customers. PLC technology offers a number of advantages over other communication technologies, including its ability to use existing power lines for data transmission. This makes it a cost-effective and easy-to-deploy solution for a wide range of applications.

Day 2 at **Enlit Europe**

Why not take the opportunity to find out how the utility industry is approaching grid modernization, and how interoperability has been key in achieving success?

Join DLMS President **Sergio Lazzarotto** and fellow speakers this morning to discuss the opportunities and challenges of deploying cost efficient solutions that are interoperable and compatible globally!

Session Line-up:

- ➡ **Willem Strabbing**, Technical Director, **ESMIG**
- ➡ **Hans Hendrix**, Director of Sales, Marketing & Innovation - Pidpa
- ➡ **Pieter De Cocker**, Smart Metering SME - Pidpa
- ➡ **Camille Marzuoli**, Representative, **STEG**
- ➡ **Pieter Coetzee**, President - **IDIS Association**
- ➡ **Charles Van Dyke**, Head Working Group Marketing - OMS
- ➡ **Peter Jensen**, Chair TC13, **IEC**
- ➡ **Mark Ossel**, Board Member, **OSGP Alliance**
- ➡ **Kaveh Razazian**, **PRIME Alliance AISBL**
- ➡ **Tony Field**, Chairman, **DLMS UA**
